Fortem Capital Dynamic Growth Fund

A sub-fund of Fortem Global Investment Funds PLC

Class Z Accumulating Shares in Sterling

ISIN: IE00BRJL4J95

The Fund is managed by Waystone Management Company (IE) Limited

Objectives and Investment Policy
Objective

The investment objective of the Fund is to generate capital growth over the longer term

Investment Policy

The Fund will seek to achieve its objective through its investments, by obtaining exposure to a wide range of asset classes

Essential features of the Fund

- ~ The Fund may invest without limit, in developed and emerging market equities, equity related securities (such as equity market indices), fixed income securities, collective investment schemes (CIS), cash and equivalents, as well as indirect exposure to other asset classes such as real estate, fx and commodities.
- ~ The Fund may also invest indirectly in these investments through Financial Derivative Instruments ("FDI") including but not limited to swaps and options.
- ~ The Fund is actively managed. The reference benchmarks for the Fund are the Bank of England Base Rate and the UK Consumer Price Index and are used for comparison purposes only. The Investment Manager uses its expertise to select investments for the Fund and has discretion to invest without constraint to the reference benchmark.
- ~ The Fund will not be subject to any geographic, sector or market capitalisation constraints.
- ~ The Investment Manager has the discretion to consider which investments may generate a return for the Fund and the overall allocation of investment in same. This is done through research using own proprietary databases and external services.
- ~ On demand, you may buy or sell your shares on any Business Day, being a weekday on which commercial banks in Ireland and United Kingdom (and in any other financial centre that the Directors may determine to be relevant for the operations of the Fund) are open for normal banking business.
- ~ Income and capital gains arising in respect of the shares will be re-invested and reflected in its Net Asset Value per share.
- ~ The Fund is suitable for investors who are seeking capital growth over a long-term horizon, but who are willing to tolerate medium to high risks due to the potentially volatile nature of the investments.
- ~ The Fund may use total return swaps for investment purposes to gain economic exposure to the underlying investments. The approved counterparty may provide collateral to the Fund, including cash, US treasury bills and other high-quality government bonds with a maturity of up to 7 years.
- ~ The Fund may construct strategies using FDIs that are long-only, short-only or combinations of long and short by investing indirectly in the underlying assets.
- ~ There is no limit on the amount FDIs which may be used by the Fund, subject to the Fund's total exposure including leverage (calculated as a sum of notional of exposure of FDI being utilised by the Fund) being in the range of 200-500% and is not expected to exceed 500% of the Fund's total Net Asset Value.
- ~ The Fund will use the absolute VaR approach to measure global exposure.
- ~ Any investment in any Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Risk and Reward Profile

- ~ The lowest category does not mean 'risk free'.
- ~ The Fund's risk category shown is not guaranteed and may change in the future for various reasons including general market developments, economic cycles and changes such as geo-political factors.
- ~ The risk category selected is based upon the Fund's past performance, is an indicator of how much the Fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. However, any historical data may not be a reliable indicator of future returns.
- ~ The value of investments and the income from them and therefore the value of, and income from the Shares in the Fund, may go down as well as up and an investor may not get back the amount he or she invests.
- ~ Particular risks not adequately covered by the risk indicator include:
 - o **Counterparty Risk:** The Fund may enter into over-the-counter ("OTC") FDIs with approved counterparties. If an approved counterparty defaults, there is a risk that the Fund will lose all or some of the value of that FDI.
 - o **Issuer Risk:** The insolvency of any institution that is the issuer of a Bond held by the Fund may expose the Fund to financial loss.
- ~ The Fund has been classed as 4 because its historical volatility has been measured as average.
- ~ Portfolio Currency Risk: As the Fund invests in overseas securities, movements in exchange rates may cause the value of your investment to increase or decrease.
- ~ Investors should refer to the prospectus, which can provide more information on risks.
