

Fortem Capital US Equity Income Fund

Monthly Report – 31st March 2026

UK & EU – For professional and institutional investors only
Switzerland – this is an advertising document for professional and institutional clients as defined by the Swiss Financial Services Act only

Investment Overview

The Fund aims to generate quarterly income of 4% p.a., whilst providing for capital growth such that the Fund's total return tracks the S&P 500 Net Total Return Index, with the opportunity for slight outperformance.

Background

- ◆ Gravitation towards passive US equity as consistent alpha hard to find.
- ◆ This can create issues for income investors since the S&P 500 traditionally offers lower yields.
- ◆ Active income funds tend to deviate away from the benchmark for a number of reasons:
 - Stock / sector / factor deviation in order to select higher yielding companies
 - Selling of options without mitigating the additional market risk they introduce

The Fund Will

- ◆ Generate its target income from a combination of both receiving dividends and collecting premiums from the buying and selling of listed options on the S&P 500 Index.

Dividend Yield + Option Premiums → 4% p.a. target income

- ◆ Additionally employ hedging techniques in order to minimize daily tracking error to the S&P 500 Total Return Index.
- ◆ Use S&P 500 futures to manage the Fund's exposure back to a daily target beta of 1.
